Objective

Motivated and dedicated Computer Science Engineering student with knowledge of programming and web development. Passionate about learning emerging technologies and building practical solutions through projects and internships. Seeking an entry-level opportunity to apply technical skills, gain professional experience, and contribute to innovative software development projects.

Experience

- ICT ACADEMY OF KERALA** 8 May 2023 - 7 July 2023
Intern
Successfully completed a MERN Stack Development internship, gaining practical experience in React.js, Node.js, Express.js, MongoDB, REST APIs, and full-stack web application development.
- METALOOP** June 2025 -
Intern
Completed an internship focused on mobile application development, gaining hands-on experience in application design, development workflows, user interface implementation, and software development practices.

Education

- Vyasa Vidyanikethan , Perumbavoor** 2019
SSLC
80 %
- Govt. Vocational Higher Secondary School,Iringole** 2021
Higher Secondary Education
95%
- Govt. Polytechnic College,Perumbavoor** 2024
Diploma in Computer Science
Cgpa 8.57
- Adi Shankara Institute of Engineering and Technology,kalady** Currently pursuing
B.Tech in Computer Science and Engineering

Skills

- Full Stack Development (MERN)
- HTML
- CSS
- JavaScript
- MySQL
- C programming,Java,Python

Projects

- EduAI**
Developed a Personalized Learning System to analyze and monitor student academic performance using historical and current academic data. The system provides personalized learning recommendations, attendance tracking, quizzes, flashcards, and progress monitoring to support academic improvement.
- Crumb Mapper**
Developed a real-time crumb detection system using Python and OpenCV. The project uses image processing techniques to detect and track crumbs through live camera input and display visual tracking information.
- Renewora – Sustainable E-Commerce Platform**
Developed an eco-friendly e-commerce platform that promotes sustainable products and responsible

shopping. The application includes user authentication, product management, and a responsive user interface for an enhanced user experience.

- **From You – Charity Donation Platform**

Developed a MERN-based charity donation platform that enables users to donate and request gently used items. The system includes user authentication, product listing, category-based search, location-based item discovery, and product management features, promoting reuse and community support.

- **Library Management System**

Developed a web-based Library Management System to manage books and user records efficiently. The system includes features such as book search, issue and return management, and user authentication.

- **Weather Forecasting Web Application**

Developed a weather forecasting web application using OpenWeather API to display real-time weather information. The application provides details such as temperature, humidity, and weather conditions through a user-friendly interface.

Certifications

- **Spoken tutorial -IIT Bombay**

LaTeX, Arduino,PHP and MySQL,Python ,C programming

- **Ethical Hacking**

Udmey (Technolvalley AKS)

- **Python**

Gtech Computer Education Perumbavoor

Activities

- **IEEE Extreme programming competition 2025**

- **TinkerHub**

Useless project and Hackathon

- **Cyberfriday workshop**

- **Mulearn-Beyond Us hackathon**

- **Doodle Art competition**

Won second prize for Doodle Art competition,Brahma'23

- **Interpoly Athletics meet**

- **Nss volunteer 2019-21**
